1. INTRODUCTION

ZealiD AB, SE556972-4288, (ZealiD) was founded in 2014. It is a Swedish limited liability company (Aktiebolag) held privately by private individuals, Collector Bank, NFT Ventures and Almi Invest. ZealiD is under the supervision of The Swedish Financial Supervisory Authority, The Swedish Post and Telecom Authority (PTS) and the Swedish Data Protection Agency (Datainspektionen). The principal activities of ZealiD are offering trust services and related technical solutions to the global finance industry with a focus on the European Union.

1.1. Overview

ZealiD is a Certificate Authority (CA) and issues qualified certificates and electronic signatures to subscribers.

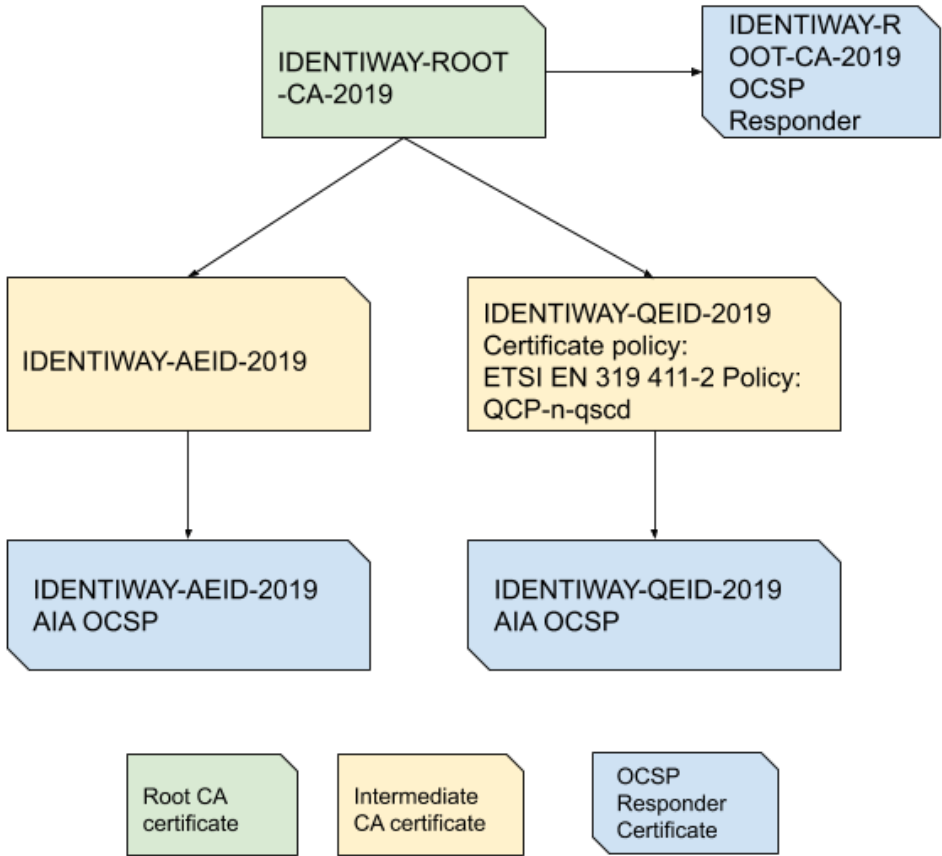

This Certificate Practice Statement (CPS) describes the practices for ZealiD's "ZealiD QeID Service". It is based on a Certificate Policy (CP) defined by:

- eIDAS (EU regulation nr 910/2014),
- ETSI 319 401, 319 411-1 and 319 411-2. Policies: NCP+ and QCP-n-qscd
- ETSI EN 419 241-1 and 419 241-2
- Relevant ISO standards e.g. 27001

ZealiD currently uses this certificate chains:

- ZealiD-Root-CA-2019 valid 2019-2049

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Certificates issued by ZealiD QeID Service will be used for

- Providing software based electronic identities (electronic ID) in smartphone applications
- Subscriber non-repudiation electronic signing
- Subscriber authentication

This CPS is based on the structure suggested by Certification Practice Framework IETF RFC 3647. Section order and headings have been kept as close as possible to the suggested framework.

1.2. Document name and identification

This CPS is titled *ZealiD QeID Certificate Practice Statement*. The Issuing CPS has the object identifier: `OID 1.2.752.251.1.05.51.1.13`

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

1.3. PKI participants

ZealiD QeID Service will issue certificates to subscribers in order to provide software based IDs, non-repudiation signing and subscriber strong authentication.

1.3.1. Certification authorities

ZealiD is the issuing CA. The name of the CA in the “Issuer” field of the CA certificate is “ZealiD QEID 2019”.

1.3.2. Registration authorities

Registration authorities (RA) refer to the entities that establish identity proofing procedures for end-user certificate applicants, perform identification and authentication of certificate applicants, initiate or pass along revocation requests for certificates, and approve applications for renewal or re-keying certificates on behalf of a CA.

RA’s may be external to the CA.

Identified RA’s for this CPS are:

- ID Now GMBH (Certified eIDAS RA)
- ZealiD’s TRA Service (upon certification) and
- any certified external RA compliant with eIDAS/ETSI

1.3.3. Subscribers

The subscribers identified in this CPS are natural persons within the scope of their electronic identity. Certificates and signatures are issued to natural persons where the subscriber and the subject are identical.

1.3.4. Relying parties

Relying parties are defined as any Subscriber (as defined in [Subscribers above](#)) or any end-entity (also referred to as Customers) relying on the certificate issued by the ZealiD QeID Service (CA).

1.3.5. Other participants

No stipulation.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

1.4. Certificate usage

1.4.1. *Appropriate certificate uses*

Certificates under this CPS are issued to Subscribers for non-repudiation signing, strong authentication and issuance of electronic identity that will be issued to end-users.

1.4.2. *Prohibited certificate uses*

Applications using the certificates issued under this CPS must consider the key usage purpose stated in the “Key Usage” extension field in the certificate.

1.5. Policy administration

1.5.1. *Organization administering the document*

This CPS is administered by ZealiD:

ZealiD AB
Registry code SE5569724288
Box 3437
111 56 Stockholm
Visiting Address: Jakobsbergsgatan 16

Head Office: +46 (0)10-199 40 00
Email: info@zealid.com
<http://www.idenitway.com>

1.5.2. *Contact person*

Compliance Manager
Email: legal@ZealiD.com

1.5.3. *Person determining CPS suitability for the policy*

Compliance Manager determines suitability. Compliance Manager is responsible to review and propose updates to the CPS regularly or when regulatory changes arise.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

1.5.4. CPS approval procedures

The ZealiD Management board, led by the CEO, is responsible for the trust service.

All CPS versions are subject to final confirmation and approval by the ZealiD Management Board and amended CPS is enforced by the CEO and Management Board. The practices defined within the CPS shall be implemented by the Management Board.

Spelling corrections, translation activities and contact details updates are documented in the version table of this CPS.

In case of substantial changes, a new CPS version is clearly distinguishable from previous ones.

The amended CPS along with the enforcement date, which cannot be earlier than 14 days after publication, is published electronically on ZealiD website repository as well as communicated internally.

1.6. Definitions and acronyms

1.6.1. Definitions

Term	Definition
Authentication	Unique identification of a person by checking his/her alleged identity.
Certificate	Public Key, together with additional information, laid down in the Certificate Profile rendered non forgeable via encipherment using the Private Key of the Certificate Authority which issued it.
Certificate Authority	A part of the trust service provider's structure responsible for issuing and verifying electronic Certificates and Certificate Revocation Lists with its electronic signature. ZealiD has created the ZealiD QeID Service that issues Certificates under this CPS.
Certificate Pair	A pair of Certificates consisting of one Authentication Certificate and one Qualified Electronic Signature Certificate.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Certificate Policy	A set of rules that indicates applicability of a specific Certificate to a particular community and/or PKI implementation with common security requirements.
Certification Practice Statement	One of the several documents that all together form the governance framework in which Certificates are created, issued, managed, and used.
Certificate Profile	Document that determines the information contained within a Certificate as well as the minimal requirements towards the Certificate.
Certificate Revocation List	A list of invalid (revoked, suspended) Certificates. CRL contains suspended and revoked Certificates during their validity period, i.e. until they expire.
CA Service	Trust service related to issuing Certificates, managing suspension, termination of suspension, revocation, modification and re-key of the Certificates. In this CPS the CA Service is called ZealiD QeID Service.
Conformity Assessment Body (CAB)/Certification body	Official registered or accredited certification body that can assess and certify CA Services
Directory Service	Trust service related to publication of Certificate validity information.
Distinguished name	Unique Subject name in the infrastructure of Certificates.
Encrypting	Information treatment method changing the information unreadable for those who do not have the necessary skills or rights.
ZealiD	ZealiDAB, the legal entity and provider behind the Trust Service and CA Service.
ZealiD	The brand name used facing consumers, customers, relying parties and the market in general.
ZealiD QeID Service	The specific name of the CA Service issuing qualified electronic signatures.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD TRA Service	Trust service related to the identification and authentication for ZealiD QeID Service.
Integrity	A characteristic of an array: information has not been changed after the array was created.
Object Identifier	An identifier used to uniquely name of an object (OID).
PIN code	Activation code for the Authentication Certificate and for the Qualified Electronic Signature Certificate.
Private Key	The key of a key pair that is assumed to be kept secret by the subscriber of the key pair, and that is used to create electronic signatures and/or to decrypt electronic records or files that were encrypted with the corresponding Public Key.

Public Key	The key of a key pair that may be publicly disclosed by the holder of the corresponding Private Key and that is used by Relying Parties to verify electronic signatures created with the holder's corresponding Private Key and/or to encrypt messages so that they can be decrypted only with the holder's corresponding Private Key.
Qualified Certificate	A certificate for electronic signatures, that is issued by the qualified trust service provider and meets the requirements laid down in Annex I of eIDAS Regulation [8].
Qualified Electronic Signature	Advanced electronic signature that is created by a qualified electronic signature creation device, and which is based on a Qualified Certificate for electronic signatures.
Qualified Electronic Signature Creation Device	A Secure Signature Creation Device that meets the requirements laid down in eIDAS Regulation [8].
Relying Party	Entity that relies on the information contained within a Certificate. Relying parties are sometimes referred to as Customers.
Registration Authority	Entity that is responsible for identification and Authentication of Subjects of Certificates. Additionally, the Registration Authority may accept Certificate applications, check the applications and/or forward the applications to the Certificate Authority.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Secure Cryptographic Device	Device which holds the Private Key of the user, protects this key against compromise and performs signing or decryption functions on behalf of the user.
Idenittrade TRA Practice Statement	A statement of practices that ZealiD employs in providing RA service (also referred to as the TRA Trust Service Practice Statement - TSPS).
Subscriber	A natural person to whom the CA Service issue certificates and key as a service if he/she has requested it.
Subject	In this document, the Subject is the same as the Subscriber.
Terms and Conditions	Document that describes the obligations and responsibilities of the Subscriber with respect to using Certificates. The Subscriber has to be familiar with the document and accept the Terms and Conditions upon submitting an application for the Certificate based services.

1.6.2. Acronyms

Acronym	Definition
CA	Certificate Authority
CAB	Conformity Assessment Body (eIDAS)
CP	Certificate Policy

CPS	Certification Practice Statement
CRL	Certificate Revocation List
eIDAS	Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC
NCP+	Normalised Certificate Policy requiring a Secure Cryptographic Device from ETSI EN 319 411-1

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

OCSP	Online Certificate Status Protocol
OID	Object Identifier, a unique object identification code
PBGB	Police and Border Guard Board
PKI	Public Key Infrastructure
PTS	Swedish Post & Telecoms Authority
QSCD	Qualified Electronic Signature Creation Device
QCP-n-qscd	Policy for EU qualified certificate issued to a natural person where the private key and the related certificate reside on a QSCD from ETSI EN 319 411-2 [5]
RA	Registration Authority
SB	Supervisory Body (eIDAS) - see PTS
TRA Service	Trusted Registration Authority Service provided by ZealiD under the brand name ZealiD

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement

2. PUBLICATION AND REPOSITORY RESPONSIBILITIES

2.1. Repositories

ZealiD publishes to its publicly available repository (24/7, 99% availability), <https://ZealiD.com/en/repository>, the following documents:

- ZealiD QeID CPS (this document)
- ZealiD QeID Service Description
- QeID Terms and Conditions

2.2. Publication of certification information

ZealiD makes the following documents publicly available:

- Trust Service Practice Statement (this CPS)
- Audit Results
- Insurance Policies
- Certificates, including root certificates and CA certificates under which certificates for subscribers are issued
- Profiles
- Terms and Conditions ZealiD QeID
- Online Certificate Status Protocol

A published Online Certificate Status Protocol (OCSP) will contain all processed revocation information at the time of publication. Publication of revocation information is according to the provisions found in section 4.9. Publication of information will be within the limitations stipulated in sections 9.3 and 9.4.

2.3. Time or frequency of publication

Documentation listed under Repositories above are published with minimum delay when:

- any significant change in the underlying TRA service is made or at minimum once per year
- any legal, regulatory or otherwise mandatory requirement calls for an update

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Upcoming significant changes will be made public minimum 14 days in advance.

Subscribers and relying parties will be notified via the ZealiD public repository and further according to the ZealiD Routine External Communication choice of appropriate channel.

2.4. Access controls on repositories

Information published in ZealiD's repository is public and not considered confidential information.

ZealiD has implemented all necessary security measures and enforced access control in order to prevent unauthorized access to add, delete, or modify entries into its repository. All CPS versions are subject to final confirmation and approval by the ZealiD Management Board before publication. Publishing into ZealiD's repository is restricted to authorized employees of ZealiD with multi-factor authentication access.

3. IDENTIFICATION AND AUTHENTICATION (I&A)

3.1. Naming

3.1.1. Types of names

3.1.1.1. Subscriber

Type of names assigned to the Subscriber is described in the Certificate Profile.

3.1.1.2. Issuing CA

Attribute	Value description
commonName (CN, OID 2.5.4.3)	ZealiD CA
OrganizationalUnitName	www.zealid.com

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

(OU, OID 2.5.4.11)	
Organization name (O, OID 2.5.4.10)	ZealiD AB
Organizational identifier (OID 2.5.4.97)	SE556972-4288
Country (C, OID 2.5.4.6)	SE

3.1.2. Need for names to be meaningful

All the values in the Subscriber information section of a Certificate are meaningful. Meaning of names in different fields of the Certificates is described in the Certificate Profile.

3.1.3. Anonymity or pseudonymity of subscribers

Anonymity or pseudonymity of subscribers is not allowed.

3.1.4. Rules for interpreting various name forms

International letters are encoded in UTF-8. The data extracted from an identity document follows ICAO transcription rules where necessary.

3.1.5. Uniqueness of names

Subscriber's distinguished name is compiled according to the profile described in the Certificate Profile. ZealiD does not issue Certificates with an identical Common Name (CN), Serial Number (S) and e-mail addresses in Subject Alternative Name (SAN) fields to different Subscribers.

3.1.6. Recognition, authentication, and role of trademarks

Trademarks are not allowed.

3.2. Initial identity validation

3.2.1. Method to prove possession of private key

Private Key of the Subscriber is generated using a smartphone app. This can be either the ZealiD App or ZealiD App SDK. In the ZealiD App or App SDK the Subscriber's Private Key is generated after successful completion of a registration process. Registration processes are conducted by certified eIDAS RAs.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

3.2.2. Authentication of organization identity

No stipulation.

3.2.3. Authentication of individual identity

A certified eIDAS RA (internal or external) verifies the identity of the Subscriber. This data is submitted to ZealiD QeID Service.

At present the certified RA is ID Now GmbH. Future RAs will include the ZealiD TRA Service and may include other external RAs.

3.2.4. Non-verified subscriber information

Non-verified Subscriber information is not allowed in the Certificate.

3.2.5. Validation of authority

Representation of the Subscriber is not allowed.

3.2.6. Criteria for interoperation

No stipulation.

3.3. Identification and authentication for re-key requests

No stipulation.

3.3.1. Identification and authentication for routine re-key

No stipulation.

3.3.2. Identification and authentication for re-key after revocation

No stipulation.

3.4. Identification and authentication for revocation request

Please refer to 4.9.3. of this CPS.

4. CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.1. Certificate Application

4.1.1. Who can submit a certificate application

Any natural person can submit a certificate application to ZealiD via a contracted RA service or the internal RA Service called ZealiD TRA Service (upon TRA service certification).

The current RA for ZealiD QeID service is ID Now GmbH.

The Subscriber submits an application for a certificate via the RA Service.

ZealiD accepts Certificate requests only from contracted external RA Services.

The RAs are responsible for prevention of unwanted applicants (e.g. minors) as part of identification processes.

4.1.2. Enrollment process and responsibilities

The registration and setup of subscriber applicants is done remotely (self-service) by the subscriber in a process provided by the RA service. The RA Service needs to be certified to meet the requirements on Authentication of Subscribers by:

- demonstrating physical presence according eIDAS article 24, 1d and
- being conformant with the high security and level of assurance recognized in EU member state national law (e.g. German Videoident ordinance of BNetzA, VDG §11)

Subscriber applicants need to submit sufficient information to allow Issuing CAs and RAs to successfully perform the required verification. Issuing CAs and RAs shall protect communications and store information presented by the Applicant during the application process according to their practice statements.

4.1.3. Annual Control of QSCD

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD monitors certification status of QSCDs in use and annually checks that QSCD is recognised by verifying the validity of Common Criteria Certificate issued for the QSCD or that it is continuously valid in the European Commission's list of Secure Signature Creation Devices and Qualified Signature notified by the member states.

If the validity in the European Commission's list of Secure Signature Creation Devices and Qualified Signature notified by the member states is expired due to the modification, then ZealiD will investigate the cause of the modification from the responsible member state or/and designated certification body. If the QSCD certificate is expired or invalidated, then ZealiD will take the following actions:

- notify immediately its supervisory body and conformity assessment body (CAB)
- revoke of any affected certificates;
- Inform all affected subscribers and relying parties.

4.2. Certificate application processing

4.2.1. Performing identification and authentication functions

The RA Service validates the Subscriber's identity as described in the RA TSPS. RA Service sends the Certificate requests to ZealiD QeID Service. Application for a Subscriber will be generated automatically via the RA Service. All communications shall be securely stored along with all information presented directly by the Subscriber during the application process.

The data exchange is done via encrypted communication where a unique identifier is used by the RA Service in order to authenticate it.

Before starting the authentication, the Subscriber shall accept RA Service Terms and Conditions.

4.2.2. Approval or rejection of certificate applications

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Applications are done by the Subscriber registering in the RA service using the ZealiD smartphone app or app SDK. The acceptance or rejection of a subscriber application is determined by the RA Service.

Subscriber applications will be approved if they meet the requirements in this CPS and those set forth in the RA Service TSPS. And where there is no other reason for rejection.

In case of rejection, a subscriber will be informed as part of the RA Service as to the reason for the rejection decision, and provided details as to how to proceed for an approval.

ZealiD shall reject applications for Certificates where validation of all items cannot successfully be completed.

4.2.3. Time to process certificate applications

Applications are processed automatically by ZealiD QeID Service immediately after the application is submitted from the RA Service.

4.3. Certificate issuance

4.3.1. CA actions during certificate issuance

After verifying that the Subscriber's identification data in the Certificate request matches with the identification data in the data set, ZealiD QeID Service automatically issues the corresponding Certificates.

4.3.2. Notification to subscribers by the CA of issuance of certificate

The subscriber will be notified of issuance of certificate with a message within the ZealiD smartphone app immediately and a separate text message as it an online process.

4.4. Certificate acceptance

4.4.1. Conduct constituting certificate acceptance

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD QeID Service shall inform the Subscriber that s/he may not use the Certificate until the Subscriber has reviewed and verified the accuracy of the data incorporated into the Certificate. To avoid this being an open-ended stipulation, the issuing service may set a time limit by when the Certificate is deemed to be accepted.

Terms and Conditions are made available to the Subscriber via the ZealiD application prior acceptance.

Once the Subscriber verifies accuracy of data and confirms term and conditions, the Certificate is deemed as accepted. The consent and acceptance is logged.

After the Terms and Conditions were accepted, they are available within the ZealiD application or ZealiD Public Repository.

4.4.2. Publication of the certificate by the CA

ZealiD QeID Service may publish a Certificate by sending the Certificate to the Subscriber and/or publishing in our Certificate Repository. Certificate validity can be checked through OCSP service.

4.4.3. Notification of certificate issuance by the CA to other entities

ZealiD QeID service will by means of secure data communication inform the RA Service responsible for the application processing of the certificate issuance.

4.5. Key pair and certificate usage

4.5.1. Subscriber private key and certificate usage

The Subscriber is required to use the Certificate and Private Key and lawfully and in accordance with:

- this CPS;
- the Subscriber Terms and Conditions ZealiD QeID,
- the RA Service Terms and Conditions,
- the TSPS of the RA Service

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.5.2. Relying party public key and certificate usage

The Relying Party is required to use the Public Key and Certificate lawfully and in accordance with:

- this CPS;
- the ZealiD Terms and Conditions

4.6. Certificate renewal

Renewal of Certificates is not allowed.

4.6.1. Circumstance for certificate renewal

No stipulation.

4.6.2. Who may request renewal

No stipulation.

4.6.3. Processing certificate renewal requests

No stipulation.

4.6.4. Notification of new certificate issuance to subscriber

No stipulation.

4.6.5. Conduct constituting acceptance of a renewal certificate

No stipulation.

4.6.6. Publication of the renewal certificate by the CA

No stipulation.

4.6.7. Notification of certificate issuance by the CA to other entities

No stipulation.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.7. Certificate re-key

Certificate Re-Key initiated by the Subscriber is considered to be a new application and processed accordingly. Certificate re-key is not allowed.

4.7.1. Circumstance for certificate re-key

No stipulation.

4.7.2. Who may request certification of a new public key

No stipulation.

4.7.3. Processing certificate re-keying requests

No stipulation.

4.7.4. Notification of new certificate issuance to subscriber

No stipulation.

4.7.5. Conduct constituting acceptance of a re-keyed certificate

No stipulation.

4.7.6. Publication of the rekeyed certificate by the CA

No stipulation.

4.7.7. Notification of certificate issuance by the CA to other entities

No stipulation.

4.8. Certificate modification

Modification is processed as a new application and not allowed.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.8.1. Circumstance for certificate modification

No stipulation.

4.8.2. Who may request certificate modification

No stipulation.

4.8.3. Processing certificate modification requests

No stipulation.

4.8.4. Notification of new certificate issuance to subscriber

No stipulation.

4.8.5. Conduct constituting acceptance of modified certificate

No stipulation.

4.8.6. Publication of the modified certificate by the CA

No stipulation.

4.8.7. Notification of certificate issuance by the CA to other entities

No stipulation.

4.9. Certificate revocation and suspension

4.9.1. Circumstances for revocation

If the Subscriber loses control over his/her Private key or PIN codes, the Subscriber shall apply for Certificate revocation immediately.

ZealiD QeID Service has the right to revoke Certificates and Private keys if one or more of the following occurs:

- the Subscriber requests revocation using the ZealiD App or Site,
- the Subscriber has blocked the PIN code(s)

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- ZealiD QeID Service obtains evidence that the Subscriber has lost control over Private Keys or PIN codes;
- the Subscriber notifies ZealiD QeID Service that the original Certificate request was not authorised and does not retroactively grant authorisation;
- ZealiD QeID Service obtains evidence that the Subscriber's Private Key corresponding to the Public Key in the Certificate suffered a key compromise or no longer complies with the requirements;
- ZealiD QeID Service obtains evidence that the Certificate was misused; the service is made aware that the Subscriber has violated one or more of its obligations under the Terms and Conditions;
- ZealiD QeID Service is made aware of a material change in the information contained in the Certificate;
- ZealiD QeID Service is made aware that the Certificate was not issued in accordance with the CPS and/or CP;
- ZealiD QeID Service determines that any of the information appearing in the Certificate is inaccurate or misleading;
- ZealiD QeID Service ceases operations for any reason and has not made arrangements for another CA to provide revocation support for the Certificate;
- ZealiD QeID Service's right to issue Certificates is revoked or terminated, unless ZealiD QeID Service has made arrangements to continue maintaining the OCSP repository;
- ZealiD QeID Service is made aware of a possible compromise of the Private Key of the CA used for issuing the Certificate;
- revocation is required by the CPS;
- the technical content or format of the Certificate presents an unacceptable risk to Relying Parties;

In case the RA has withdrawn Identity Provider status, the ZealiD QeID Service has the right to revoke all the Certificates which were issued for identities provided by this Identity Provider.

4.9.2. Who can request revocation

The Subscriber can request revocation of the Subscriber's Certificates at any time.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

RA may request revocation of the Subscriber's certificates based on Subscriber's application and RA TSPS.

CA may request revocation for any of the reasons listed in this CPS 4.9.1.

4.9.3. Procedure for revocation request

The Subscriber can request revocation in the following way:

- The Subscriber can request revocation of Certificates by deleting the profile in the ZealiD smartphone app or SDK app.
- By contacting the ZealiD support desk and requesting revocation. The support agent verifies the Subscriber by using the identification data in the Subscriber's application. After the Subscriber's identity and legality is verified, the agent revokes the Certificate.

After ZealiD has received an application for revocation, ZealiD processes it immediately. The revocation of the Certificate is recorded in the certificate database of ZealiD QeID Service, which has its time stamping synchronized with UTC at least once per 24 hours. The Subscriber has a possibility to verify from the ZealiD System that the Certificate has been revoked.

Revoked Certificate can not be reinstated.

The RA can request revocation in the following ways:

- Using machine interface to flag a Subscriber's profile for revocation.

4.9.4. Revocation request grace period

The Subscriber is required to request revocation immediately after verifying the loss or theft of the device.

4.9.5. Time within which CA must process the revocation request

ZealiD QeID Service immediately processes an application for revocation, after an application for revocation has been submitted.

4.9.6. Revocation checking requirement for relying parties

Please see Terms & Conditions ZealiD QeID Service.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.9.7. CRL issuance frequency (if applicable)

The CRL are not issued. OCSP is used instead.

4.9.8. Maximum latency for CRLs (if applicable)

No stipulation.

4.9.9. On-line revocation/status checking availability

The service is free of charge and publically available 24/7 at <http://ocsp.ZealiD.com>

4.9.10. On-line revocation checking requirements

The mechanisms available to the Relying Party for checking the status of the Certificate on which it wishes to rely are established in Terms and Conditions ZealiD QeID.

4.9.11. Other forms of revocation advertisements available

Revocation status information of expired Certificates can be requested at support@ZealiD.com.

4.9.12. Special requirements re key compromise

No stipulation.

4.9.13. Circumstances for suspension

No stipulation.

4.9.14. Who can request suspension

No stipulation.

4.9.15. Procedure for suspension request

No stipulation.

4.9.16. Limits on suspension period

No stipulation.

4.10. Certificate status services

ZealiD QeID Service offers OCSP certificate status request services accessible over HTTP.

The URL of the OCSP service is included in the certificate.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

4.10.1. Operational characteristics

No stipulation.

4.10.2. Service availability

ZealiD QeID Service provides 24 hour availability of Certificate Status Services, 7 days a week with a minimum of 99% availability overall per year.

4.10.3. Optional features

No stipulation.

4.11. End of subscription

The validity period of the Certificate is described in the ZealiD Certificate and OCSP Profile.

4.12. Key escrow and recovery

The ZealiD QeID Service does not offer the Subscriber key escrow and recovery services.

4.13. Key escrow and recovery policy and practices

No stipulation.

4.14. Session key encapsulation and recovery policy and practices

No stipulation.

5. FACILITY, MANAGEMENT, AND OPERATIONAL CONTROLS

5.1. Physical controls

The ZealiD Management Board defines and approves policies and practices related to information security for its trust services.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD has implemented a Policy Information Security with a supporting Policy IT Security. These policies specify security measures that are required and define a set of routines specifying how security measures are implemented.

ZealiD's Policies include the security controls and operating procedures for all physical facilities, systems and information assets providing the trusted services.

ZealiD performs risk assessment regularly in order to evaluate business risks, IT risks and risks related to the registration authority functions. This includes risks related to physical facilities. These risk assessments determine the necessary security requirements and operational procedures.

ZealiD management board approves risk assessment, oversees risk mitigation and accepts any residual risks.

As part of regular training and communication, ZealiD management communicates information security policies and procedures to employees and relevant external parties as appropriate.

In addition, ZealiD supports its practices and information security objectives for Trust Services with several types of reviews, audits and controls.

5.1.1. Site location and construction

ZealiD operations are conducted in ZealiD's premises in Sweden and Lithuania, and in premises of supporting contractors.

ZealiD QeID Services are produced within a physically protected environment that deters, prevents, and detects unauthorised use of, access to, or disclosure of Information and systems. The protection provided a high level of protection corresponding to the threat of identified risks. ZealiD ensures that physical access to critical services is controlled and that physical risks to its assets are minimised.

ZealiD sites are physically protected with different layers. All external contractors are ISO 27001 certified and meet necessary physical security measures.

ZealiD has put in place necessary security mechanisms to protect the data in transit and rest, e.g. two factor access control, encryption and logging in order to detect unauthorized use of, access to, or disclosure of

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

sensitive information and systems content. The principle of minimum access rights are implemented and only authorized resources can access the aforementioned systems.

5.1.2. Physical access

ZealiD contracted data centre for the ZealiD QeID Service is protected by six tiers of physical security, with access to the lower tier required before gaining access to the higher tier.

Access to the highest tier requires the participation of two persons in Trusted Roles.

The employees of ZealiD may gain access to the facilities of the ZealiD QeID Services only as authorised resources notified on an approved list.

A log is kept for recording all entries and exits to the data center. The data center (location provider) has no independent access to the ZealiD QeID Service hardware or software.

Common areas are outside the ZealiD QeID Service racks.

5.1.3. Power and air conditioning

The premises of ZealiD and contractors have all necessary heating, ventilation, air conditioning systems to control the temperature and relative humidity. These are state-of-the-art documented industry facilities.

Furthermore, all relevant systems are provided with an uninterruptible power supply sufficient for a short period of operation in the absence of commercial power, to support either a smooth shutdown or to re-establish commercial power.

5.1.4. Water exposures

The data center has taken every reasonable precaution to minimise the impact of water exposure to the information systems.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

5.1.5. Fire prevention and protection

The data centers have taken all reasonable precautions to prevent and extinguish fires or other damaging exposure to flame or smoke. This includes high grade early smoke detection apparatus in conditioned modules and monitored automatic smoke detection. Measures comply with the highest fire prevention and protection standards.

5.1.6. Media storage

ZealiD keeps a register of systems and storage media. ZealiD has internal routines on how to decommission and destruct media or information on the media. Media storage lifetime at ZealiD is selected according to the required period of time for record retention.

5.1.7. Waste disposal

Media containing Sensitive Information are securely disposed of when no longer required.

Paper documents and materials with sensitive Information are destroyed before disposal or placed in a secure waste handling box. Media used to collect or transmit Sensitive Information are rendered unreadable before disposal.

5.1.8. Off-site backup

The ZealiD QeID Service performs routine backups to multiple sites of critical system data, audit log data, and other Sensitive Information. The backup is both online and offline. There is no off-site backup for the HSM.

5.2. Procedural controls

Procedural controls are documented in ZealiDs internal routines. ZealiD personnel exercise administrative and management procedures and processes that are in line with the TSP's information security management procedures.

Personnel are provided training and all personnel are qualified according to knowledge and experience with respect to the trust service that is provided. Personnel competence is regularly assessed.

Managerial personnel have familiarity with security procedures for personnel, security responsibilities and experience with information security and risk assessment sufficient to carry out management functions.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Access to ZealiD systems is periodically reviewed by the CTO. Inventorying is as well conducted when there is a new hire or termination.

5.2.1. Trusted roles

ZealiD has established and documented necessary Trusted roles to run the QeID Service. ZealiD Management board appoints trusted roles and appointees accept the role responsibilities as part of their role.

Defined roles
Security Officers: Overall responsibility for administering the implementation of the security practices.
System Administrators: Authorized to install, configure and maintain the TSP's trustworthy systems for service management.
System Operators: Responsible for operating the TSP's trustworthy systems on a day-to-day basis. Authorized to perform system backup.
System Auditors: Authorized to view archives and audit logs of the TSP's trustworthy systems.
Key Managers A, B, C: Personnel holding smart cards to unlock Master Key for operations.

ZealiD has separated System Administrators with internal regulation into two roles called A- and B-type.

The assignment is made person by person with a decree of the CEO. See clause 5.2.2 for details.

Employees in Trusted Role have job descriptions that define the functions and responsibility related to the Trusted Role.

ZealiD ensures that personnel have achieved trusted status, and departmental approval is given before such personnel are:

- Issued access devices and granted access to the required facilities; or

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- Issued electronic credentials to access and perform specific functions on ZealiD or other IT systems.

Security operations are managed by ZealiD personnel in Trusted Roles, but may actually be performed by a non-specialist, operational personnel (under supervision), as defined within the Routine Roles and Responsibilities. All requirements and rules for or concerning personnel in Trusted Roles apply equally to personnel with the temporary or permanent employment contract.

5.2.2. Number of persons required per task

ZealiD has established, maintains and enforces monitoring and review procedures to ensure the segregation of duties based on job responsibility and to ensure that multiple Trusted Persons are required to perform sensitive tasks.

Key Manager	Minimum 2 persons
System Administrator	Minimum 2 persons

The following activities require a minimum of two persons, i.e. two Key Managers:

- Generation of certification keys
- Backup of the certification keys
- Restoration of the certification keys

The following activities require a minimum of two persons, a System Administrator and a Key Manager:

- Management of HSM-s and CA-system
- Backup and restore of the CA-system

5.2.3. Identification and authentication for each role

All Trusted Roles are performed by persons qualified and assigned to this role by the Management Board.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD has implemented an access control system, which identifies authorities and registers all ZealiD information system users. User accounts are created for personnel in specific roles that need access to the system in question.

Any access requires users to log in with their personal account. To access administrative commands explicit permission is necessary and auditing of the execution takes place.

ZealiD employs file system permissions to prevent misuse.

User accounts are locked as soon as possible when the role change dictates. Access logs and rules are audited annually.

5.2.4. Roles requiring separation of duties

Trusted Roles are separated and are staffed by different persons. A single person cannot be simultaneously A- and B-type System Administrator.

5.3. Personnel controls

5.3.1. Qualifications, experience, and clearance requirements

ZealiD staff are provided relevant and timely training and have the experience and competence required to carry out the duties specified in role descriptions and employment contracts. ZealiD Management System defines a structured hiring process and continuous training process in the operational and security procedures.

ZealiD employees are required to

- Demonstrate that they have not been convicted of intentional crime
- Adhere to confidentiality clauses as part of their employment
- Remain neutral with regards to competing interests such as other business

Employees in Trusted Roles are further required to:

- Not participate in any activity regarding the issuing of certificates in his/her name or legal representative of him/her

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- Remain neutral and objective with regards to any interests conflicting with Trust Services operations

Where ZealiD as a Trust Service Provider or as an RA applies for a certificate, personnel in Trusted Roles is obliged to follow all required procedures without exceptions as defined in practice statements.

5.3.2. Background check procedures

ZealiD Management System contains routines for personnel seeking to perform Trusted Roles. The routines consist of among other steps:

- Identity verification
- References from previous employers
- Background checks as per legality in respective jurisdictions and code of ethics (criminal record checks are refreshed periodically).

ZealiD background checks are proportionate to the level of information and security risks involved in roles. Background checks are conducted on all candidates for employment and trusted sub contractors performing the Trust Service providing operations with access to production data.

5.3.3. Training requirements

In addition to strict requirements on competence and experience at the time of hiring, ZealiD employees undergo regular training. It is key that all personnel have adequate training and necessary experience for the duties specified in the role description and employment contract, and maintain the necessary competency over time. Training includes:

- Internal Management System including Information and IT-security Policies, Routines
- New, updated and/or altered duties and competencies required for specific roles
- Personal Data Protection

5.3.4. Retraining frequency and requirements

Refresher training is conducted at least once per year, but typically takes place when changes occur.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

An update on new threats and security practices is conducted every 12 months or when there are new substantial changes in the area.

5.3.5. Job rotation frequency and sequence

No stipulation.

5.3.6. Sanctions for unauthorized actions

ZealiD enforces human resource policies that stipulate employee sanctions where unauthorised actions are taken. Disciplinary actions are founded in relevant national labour law and include measures up to and including termination and police reports.

5.3.7. Independent contractor requirements

ZealiD uses sub-contractors in Trusted Roles. All sub-contractors have documented contracts and follow routines set out in ZealiD’s Routines for sub-contractors. ZealiD delegates and defines the relevant requirements to the sub-contractor according to its role and tasks. The sub-contractor is responsible for compliance with defined requirements and its personnel acting in Trusted Roles.

5.3.8. Documentation supplied to personnel

Persons in Trusted Roles receive training and Trusted roles are documented and this documentation is provided as needed for the employee to perform job responsibilities.

5.4. Audit logging procedures

5.4.1. Types of events recorded

ZealiD ensures that all relevant information concerning the operation of the Trust Services is monitored and recorded for providing evidence for the purpose of legal proceedings. This information includes the archive records that are required for proving the validity of Trust Service Tokens and the audit log of the Trust Service operation.

ZealiD’s information systems leave an audit log of:

Category Log details

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- | | |
|----------------------------|--|
| General events | <ul style="list-style-type: none"> ● Software installation, patches and updates ● Backup related information ● Boot and shutdown ● Time synchronization and detection of loss of synchronization ● All requests and reports relating to suspension and termination of suspension ● All requests and reports relating to revocation, as well as the resulting actions. ● Availability and Capacity utilization |
| General Security events | <ul style="list-style-type: none"> ● System subscriber account creation ● Configuration changes to Firewalls, Switches, Intrusion detection systems, and load balancers ● System crashes or other anomalies ● Hardware failures ● PKI System access attempts ● Activities of system user with super admin rights |
| ZealiD TRA events | <ul style="list-style-type: none"> ● Registration ● Backup ● Storage ● Archival ● Destruction ● Certificate Applications ● Certificate Revocation ● Successful or unsuccessful processing of events |
| Trust Service certificates | <ul style="list-style-type: none"> ● All events relating to the life cycle of keys and certificates managed by ZealiD, including CA keys and certificates and Subscriber key pairs; |

Log entries must also include:

- Date and Time
- Identity of the entry generator
- Attribute related to entry type

ZealiD TRA Service logs of Certificate Applications include:

- Identifying document presented during application

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- Personal data from accounts provided by trusted third parties
- Acceptance of the Subscriber agreement and any specific provisions
- Liveliness check output
- Manual identity verification decision
- Data pertaining to session (e.g. smartphone type) at registration.

5.4.2. Frequency of processing log

Processing logs is scheduled at regular intervals depending on the type of log. Instructions related to frequency and work procedure related to a particular logs, is detailed in internal documentation.

Audit logs are reviewed periodically for any evidence of malicious activity and following each important operation.

5.4.3. Retention period for audit log

Audit logs are retained no less than 10 years.

In case of ZealiD termination audit logs are retained and accessible until abovementioned term for retention in accordance with clause 5.8 of this ZealiD QeID CPS.

5.4.4. Protection of audit log

Audit log is stored encrypted in an EC2 instance. The access to the audit log is given to a person who does not have access to ZealiD QeID Service hardware or software.

5.4.5. Audit log backup procedures

ZealiD performs regular backups of critical system data, audit log data, and other Sensitive Information. Audit log data backup is the part of general back-up system. ZealiD has defined backup strategy and policies in internal documentation.

5.4.6. Audit collection system (internal vs. external)

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Automated audit data is generated and recorded at the application, network and operating system level. Non-electronically generated audit data is recorded by Trusted Roles.

5.4.7. Notification to event-causing subject

No Stipulation

5.4.8. Vulnerability assessments

Events in the audit process are logged, in part, to monitor system vulnerabilities. Security vulnerability assessments are performed, reviewed, and revised. These assessments are based on real-time automated logging data and are performed on a daily, monthly, and annual basis.

5.5. Records archival

5.5.1. Types of records archived

Physical or digital archive records about certificate applications, signed Subscriber contracts, registration information (including evidence of Subscriber identity verification) and requests or applications for suspension, termination of suspension and revocation are retained.

5.5.2. Retention period for archive

Physical or digital archive records about certificate applications, signed Subscriber contracts, registration information (including evidence of Subscriber identity verification) and requests or applications for suspension, termination of suspension and revocation are retained for at least 10 years after validity of relevant certificate.

In case of termination ZealiD archive records are retained and accessible until abovementioned term for retention in accordance with clause 5.8 of this ZealiD QeID CPS.

5.5.3. Protection of archive

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The archive is encrypted and located in Amazon Glacier long term storage service.

The media holding the archive data and the applications required to process the archive data are maintained to ensure that the archive data can be accessed for the time period required.

5.5.4. Archive backup procedures

The archive is backed up to an encrypted offline media and stored in a secure safe.

5.5.5. Requirements for time-stamping of records

Database entries contain accurate time and date information. The time-stamps are not cryptographically based.

5.5.6. Archive collection system (internal or external)

ZealiD uses an internal archive collection system.

5.5.7. Procedures to obtain and verify archive information

Only authorised personnel in Trusted Roles are allowed access to the archive.

Should the records concerning the operation of services be required for the purposes of providing evidence of the correct operation of the services and for the purpose of legal proceedings, they are made available to legal authorities and/or persons whose right of access to them arises from the law.

The integrity of the information is verified during recovery tests. The archive systems with built-in integrity controls are in use.

5.6. Key changeover

No Stipulation

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

5.7. Compromise and disaster recovery

ZealiD a Routine Business Continuity Plan (BCP) that guarantees a robust set of procedures as well as physical and logical security measures to minimize the impact of disaster. All procedures have been developed to minimize potential impact and restore operations within a reasonable period of time. Business Continuity plans are tested annually to determine whether they meet requirements and business continuity needs.

5.7.1. Incident and compromise handling procedures

Within the Information Security Management System an integral part of the ZealiD QeID Service, change and incident management procedures have been developed to allow for a controlled, structured and accountable handling of incidents as well as recovery from systems or application disasters.

Detailed instructions can be found in the ZealiD Incident Management Routine and in the Information Security Management System. Finally, External Communication routine governs the means of communication that is deemed necessary by Incident Evaluation Team.

The incidents can be submitted using either internal or external submission forms (www.ZealiD.com "Report an Issue"), or as an email to support@ZealiD.com

The response time by the Incident Evaluation Team is determined by the severity of the incident, but is no longer than 24 hours on working days.

The objective of Incident Management is the immediate response and recovery of availability and the continuous protection of ZealiD QeID service.

In case of private CA key compromise ZealiD will additionally:

- Indicate that ZealiD QeID Certificates and validity information issued using this CA may no longer be valid;
- Revoke any CA certificate that has been issued for ZealiD when ZealiD is informed of the compromise of another CA or TSA;
- Inform all affected subscribers and relying parties.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

In case of algorithm or associated parameters become insufficient for its remaining intended usage ZealiD will additionally:

- Schedule a revocation of any affected ZealiD QeID Certificates;
- Inform all affected subscribers and relying parties.

The critical vulnerability is addressed no later than 48 hours after its discovery; the vulnerability is remediated or a mitigation plan is created and implemented to reduce the impact of vulnerability or a decision has been made and documented that remediation is not required.

In the event of an emergency, ZealiD will inform all the Subscribers and Relying Parties immediately (or at least within 24 hours of the crisis committee's decision) of the emergency situation and proposed solution through public information communication channels.

ZealiD will inform without undue delay but in any event within 24 hours after having become aware of it, the Supervisory Body and, where applicable, other relevant bodies as national CERT of any breach of security or loss of integrity that has a significant impact on the Idenitway QeID Service provided.

If breach is likely to involve personal data and is likely to result in high risk to the rights and freedoms of the natural person, ZealiD will notify Swedish Data Protection Inspectorate without undue delay, but at least in 72 hours after initial discovery of the personal data breach.

5.7.2. Computing resources, software, and/or data are corrupted

In such case where computing resources, software, and/or data have been identified as corrupt, appropriate steps are taken for incident investigation, appropriate escalation and incident response. If necessary, ZealiD's internal documentation in the Management System, Compromise and disaster recovery plan may be applied.

5.7.3. Entity private key compromise procedures

ZealiD key compromise is handled according to internal Incident Management documentation and considered to be a disaster.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

5.7.4. Business continuity capabilities after a disaster

In order to ensure the business continuity capabilities after a disaster ZealiD organises periodically crisis management trainings. ZealiD internal documentation defines how crisis management and communication take place in emergency situations.

ZealiD has implemented ZealiD QeID Service infrastructure in a redundant configuration to minimise the impact of disasters. In addition, important information with respect to restoring the ZealiD QeID Service is backed up for disaster recovery purposes.

5.8. CA or RA termination

5.8.1. RA termination

ZealiD has a documented Termination Plan for its TRA Service which describes the process of a service termination. Stakeholders affected by any termination will be informed according to the Termination Plan and Routine External Communication.

5.8.2. CA termination

The ZealiD QeID Service is terminated:

- with a decision of ZealiD Management Board;
- with a decision of the authority exercising supervision over the supply of the service;
- with a judicial decision;
- upon the liquidation or termination of the operations of ZealiD.

ZealiD ensures that potential disruptions to Subscribers and Relying Parties are minimised as a result of the cessation of ZealiD's services, and in particular, it ensures the continued maintenance of information required to verify the correctness of ZealiD QeID Service Tokens.

Before ZealiD terminates a CA Service the following procedures will be executed:

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- ZealiD informs all Subscribers and other entities with which ZealiD has contracts or other forms of established relations. In addition, this information will be made available to other Relying Parties;
- ZealiD makes the best effort for doing arrangements with other Trust Service Provider to transfer the provision of services for its existing customers;
- ZealiD destroys the CA private keys, including backup copies or keys withdrawn from use in such a manner that the private keys cannot be retrieved;
- ZealiD resets or destroys any hardware appliances related to this service depending on the security regulations;
- ZealiD terminates authorisation of all subcontractors to act on behalf of ZealiD in carrying out any functions relating to the process of issuing ZealiD QeID Service Tokens for this service.

The notice of termination of ZealiD's ZealiD QeID Service will be published in the public media.

ZealiD does not assume liability for any loss or damage sustained by the user of the service as a result of such termination provided that ZealiD has given the notice of termination through public information communication channels for at least one month in advance.

ZealiD has an arrangement with an insurer to cover the costs to fulfil these minimum requirements in case the TSP goes bankrupt, or for other reasons, is unable to cover the costs by itself.

The requirements are applicable also in case of RA termination. ZealiD takes over the documentation and information related to the supply of the Trust Service and provides evidence of the operation for a time period defined in relevant service-based Policy and/or Practice Statement.

6. TECHNICAL SECURITY CONTROLS

6.1. Key pair generation and installation

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD uses cryptographic keys for its Trust Services and follows industry best practices for key lifecycle management, key length and algorithms.

6.1.1. Key pair generation

The signing keys of ZealiD QeID Service are created in accordance with the internal regulation of ZealiD: Protocol CA Key Ceremony. For the key ceremony of ZealiD QeID Service key pair generation for all root CA, OSCP responders the commission is appointed by CEO with internal regulation. The commission has to include external auditor independent of ZealiD, who confirms the correctness of the procedure and report of key ceremony. The external auditor is not needed for Issuing CA generation.

Procedure for ZealiD QeID Service key pair generation is carried out according to the detailed instructions created for the specific procedure. The creation of ZealiD QeID Service keys is observed by a commission, which after the creation of the keys draws up an appropriate deed containing the public key of the created pair of keys and the hash thereof.

The ZealiD QeID key pair generation and the private key storage occur in the HSM, which is used for providing keys that at least meet the requirements established in the security standard ISO/IEC 15408, EL4+. The HSM protects the key from external compromise and operates in a physically secure environment.

ZealiD has documented procedure for conducting ZealiD QeID Service key pair generation. Head of the commission creates a report proving that the ceremony was carried out in accordance with the stated procedure and that the integrity and confidentiality of the key pair was ensured. Report is signed by the commission members, including external auditor. The more detailed procedures for key ceremony, roles and responsibilities of participants during and after the procedure, requirements for report and collected evidences are defined in internal documentation of ZealiD.

Early enough before expiration of its QeID Service certificate, ZealiD generates a new QeID Service certificate for signing subject key pairs and apply all necessary actions to avoid disruption of any operations that rely on the certificate and to allow all relying parties to become aware of key changeover. Common name of the QeID Service certificate always contains the number of the year which it was created. The new QeID

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

Service certificate is generated and distributed according to this practice statement and service-related practice statements.

6.1.2. Private key delivery to subscriber

The private key is not delivered to the subscriber.

6.1.3. Public key delivery to certificate issuer

The public key is not delivered to the subscriber.

6.1.4. CA public key delivery to relying parties

6.1.5. Key sizes

Subscriber keys are 4096 bits when RSA and 256 bits when ECC algorithm is used.

6.1.6. Public key parameters generation and quality checking

6.1.7. Key usage purposes (as per X.509 v3 key usage field)

Key usage:

- nonRepudiation
- digitalSigning

6.2. Private Key Protection and Cryptographic Module Engineering Controls

6.2.1. Cryptographic module standards and controls

The HSMs used by ZealiD QeID Service are certified with EN 419 221-5 Common Criteria (ISO/IEC 15408).

ZealiD QeID Service verifies that HSM is not tampered after its installation. This is documented in a HSM life-cycle protocol.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD QeID Service verifies that HSM is functioning correctly during usage and retains it's certification status.

6.2.2. Private key (n out of m) multi-person control

The access to ZealiD QeID Service keys is divided into three parts that are secured by different persons in Trusted Roles. For activation of the signing key of ZealiD the presence of at least two authorized persons is required in accordance with clause 5.2.2 of this CPS.

6.2.3. Private key escrow

No Stipulation.

6.2.4. Private key backup

No stipulation.

6.2.5. Private key archival

ZealiD QeID Service will not archive Trust Service private keys after it has expired. All copies of ZealiD QeID Service Trust Service private keys are destroyed after their expiry or revocation so that further use or derivation thereof is impossible.

6.2.6. Private key transfer into or from a cryptographic module

All ZealiD QeID Service Trust Service keys must be generated by and in the cryptographic module. ZealiD QeID Service generates Trust Service key pairs in the HSM in which the keys will be used.

6.2.7. Private key storage on cryptographic module

ZealiD QeID Service Private Keys held in the HSM are stored in encrypted form.

6.2.8. Method of activating private key

Each of the ZealiD QeID Service keys is protected with its PIN code.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The Subscriber is prompted to enter the PIN code before any single operation done with the Private Key.

It is not possible to try all possible PIN codes sequentially.

It is possible to create different PIN codes for the keys with different intended purposes - e.g. it is possible to create different PIN codes for the keys of the Authentication and Qualified Electronic Signature Certificates, correspondingly.

The length of the PIN codes is at least:

- for the Authentication Key 4 numbers,
- for the Signature Key 5 numbers.

6.2.9. Method of deactivating private key

6.2.10. Method of destroying private key

Method of destroying ZealiD QeID Service Trust Service private keys and internal control mechanisms depend from the options available to specific secure cryptographic module.

6.2.11. Cryptographic Module Rating

See chapter 6.1.2 above.

6.3. Other aspects of key pair management

6.3.1. Public key archival

All certificates issued (including all expired or revoked certificates) are retained and archived as part of ZealiD QeID Service routine backup procedures. The retention period is indefinite.

6.3.2. Certificate operational periods and key pair usage periods

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The operational period of a certificate ends upon revocation. The operational period for key pairs is the same as the operational period for the certificates, except that they may continue to be used for signature verification.

In addition, ZealiD QeID Service stops issuing new certificates at an appropriate date prior to the expiration of the Trust Service certificate such that no Subscriber certificate expires after the expiration of the Trust Service certificate.

If an algorithm or the appropriate key length offers no sufficient security during the validity period of the certificate, the concerned certificate will be revoked and a new certificate application will be initiated. The applicability of cryptographic algorithms and parameters is constantly supervised by ZealiD's management.

6.4. Activation data

6.4.1. Activation data generation and installation

ZealiD QeID Service Trust Service private key activation data generation and installation is performed according to the user manual of HSM.

The initial activation data is chosen by Subscriber. PIN codes are not stored by ZealiD QeID Service nor by the ZealiD Application.

6.4.2. Activation data protection

HSM is kept in secure storage and access to it have only authorized personnel in Trusted Roles. Two Key Managers need to be present physically to conduct any HSM operation.

The Subscriber shall memorise the PIN codes and not share them with anyone else. If the PIN codes are not under the control of the Subscriber, the Subscriber shall apply for a new ZealiD QeID Service or apply for Certificate revocation immediately.

6.4.3. Other aspects of activation data

No stipulation.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

6.5. Computer security controls

6.5.1. Specific computer security technical requirements

ZealiD ensures that the certification system components are secure and correctly operated, with an acceptable risk of failure.

ZealiD certification services system components are managed in accordance with defined change management procedures. These procedures include system testing in an isolated test environment and the requirement that change must be approved by the Security Officer. The approval is documented for further reference.

All critical software components of ZealiD are installed and updated from trusted sources only. There are also internal procedures to protect the integrity of certification service components against viruses, malicious and unauthorised software.

All media containing production environment software and data, audit, archive, or backup information are stored within ZealiD with appropriate physical and logical access controls designed to limit access to authorised personnel and protect such media from accidental damage (e.g., water, fire, and electromagnetic). Media management procedures and backup of records and data to different media types protects against obsolescence and deterioration of media within the period of time that records are required to be retained. Media containing Sensitive Information are securely disposed of when no longer required. All removable media are used only for the intended period of the user (either by time or by number of uses).

The performance of ZealiD services and IT systems and their capacity is monitored by System Administrators and changes are done when necessary according to internal change management procedure.

ZealiD QeID Service hardware is physically located in a secure location with multiple access and logic controls.

Incident response and vulnerability management procedures are documented in an internal document. Monitoring system detects and

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

alarms of abnormal system activities that indicate potential security violation, including intrusion into the network.

Paper documents and materials with Sensitive Information are securely disposed. Media used to collect or transmit Sensitive Information are rendered unreadable before disposal.

ZealiD security operations include: operational procedures and responsibilities, secure systems planning and acceptance, protection from malicious software, backup, network management, active monitoring of audit logs event analysis and follow-up, media handling and security, data and software exchange. ZealiD has implemented security measures and enforced access control in order to avoid unauthorized access and attempts to add, delete or modify information in applications related to the services, including certificates and revocation status information. User accounts are created for personnel in specific roles that need access to the system in question. ZealiD's personnel are authenticated before using critical applications related to the services. Multi-factor authentication for all accounts capable of directly causing certificate issuance is enforced. All users must log in with their personal account, and administrative commands are only available with explicit permission and auditing of the execution. File system permissions and other features available in the operating system security model are used to prevent any other use. User accounts are removed as soon as possible when the role change dictates. Access rules are audited annually.

6.5.2. Computer security rating

ZealiD uses standard computer systems.

6.6. Life cycle technical controls

6.6.1. System development controls

An analysis of security requirements is carried out at the design and requirements specification stage of any systems development project undertaken by ZealiD QeID Service; or an analysis is carried out on behalf of ZealiD QeID Service to ensure that security is built into the Information Technology's systems.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The software will be approved by the Security Officer and shall originate from a trusted source. New versions of software are tested in a testing environment of the appropriate service and their deployment is conducted according to documented change management procedures. Changes to systems are documented.

6.6.2. Security management controls

Measures are implemented In the information system of ZealiD QeID Service, including all workstations for guaranteeing the integrity of software and configurations, as well as for detecting fraudulent software and restricting its spread.

Only the software directly used for performing the tasks is used in the information system.

Workstations of personnel holding trusted roles and personnel developing the service or personnel with access to confidential or highly confidential data are additionally secured with two factor hard token authentication.

6.6.3. Life cycle security controls

ZealiD QeID Service policies, assets and practices (including ZealiD QeID Service CPS) for information security are reviewed by a person which is responsible for administering and maintaining them at planned intervals or in case of significant changes to ensure their continuing suitability, adequacy and effectiveness.

The configurations of ZealiD QeID Service systems are regularly checked for changes that violate ZealiD QeID Service security policies. A review of configurations of the issuing systems, security support systems, and front-end/internal support systems occurs at least on a weekly basis. The Security Officer approves changes that have an impact on the level of security provided. ZealiD QeID Service has procedures for ensuring that security patches are applied to the certification system within a reasonable time period after they become available, but not later than six months following the availability of the security patch. The reasons for not applying any security patches will be documented.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

ZealiD manages the registration of information assets and classifies all information assets into security classes according to the results of the regular security analysis consistent with the risk assessment. A responsible person has been appointed for all important information security assets.

6.7. Network security controls

ZealiD QeID Service network is divided into zones by security requirements. Communication between the zones is restricted. Only the protocols needed for ZealiD QeID Service services are allowed through the firewall.

There are separate and dedicated firewalls in place for enforcing the security policy. Access to the administrative interfaces of IT equipment is not directly accessible from the public Internet. For the most critical tasks a separate workstation is used.

The front-end systems are in a DMZ protected by a firewall and TLS offload servers. Actual security critical services and corresponding HSMs run in a secure zone that is separated by dedicated firewall and has no direct Internet access.

The root CA is in a high security zone and is air-gapped from all the other networks. ZealiD QeID Service systems are configured with only these accounts, applications, services, protocols, and ports that are used in the Trust Service operations.

ZealiD ensures that only personnel in Trusted Roles have access to a secure zone and a high security zone.

The cabling and active equipment along with their configuration in ZealiD's internal network is protected by physical and organisational measures.

The transfer of Sensitive Information outside ZealiD's internal network is encrypted.

Communication between distinct trustworthy systems is established through trusted channels that are logically distinct from other communication channels and provides assured identification of its end points and protection of the channel data from modification or disclosure.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The security of ZealiD's internal network and external connections is constantly monitored to prevent all access to protocols and services not required for the operation of the Trust Services.

ZealiD performs a vulnerability scan once a quarter on public and private IP addresses identified by ZealiD.

ZealiD QeID Service and ZealiD assets undergo penetration testing on the certification systems annually at the set up and after the infrastructure or application upgrades or modifications determined significant by ZealiD.

ZealiD records evidence that each vulnerability scans and penetration test was performed by a person or entity with the skills, tools, proficiency, code of ethics, and independence necessary to provide a reliable report.

6.8. Time-stamping

All ZealiD QeID Service CA components are synchronized daily with a Network Time Protocol (NTP) service. A dedicated authority, such as a timestamping authority, may be used to provide this trusted time. Time derived from the time service shall be used for establishing the time of:

- Initial validity time of a CA Certificate;
- Revocation of a CA Certificate;
- Issuance of Subscriber end entity Certificates.

Electronic or manual procedures may be used to maintain system time. Clock adjustments are auditable events.

7. CERTIFICATE, CRL, AND OCSP PROFILES

7.1. Certificate profile

Refer to ZealiD QeID Service Certificate and OCSP Profile.

7.2. CRL profile

No stipulation.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

7.3. OCSF profile

Refer to ZealiD QeID Service Certificate and OCSF Profile.

8. COMPLIANCE AUDIT AND OTHER ASSESSMENTS

8.1. Frequency or circumstances of assessment

The conformity of information systems, policies, practices, facilities, personnel, and assets of ZealiD are assessed by a CAB pursuant to the eIDAS regulation, ETSI Standards and relevant national law. Conformity is assessed at least periodically and when any major change is made to Trust Service operations. ZealiD's internal auditor carries out internal reviews and audits on a rolling yearly schedule.

8.2. Identity/qualifications of assessor

ZealiD's CAB is accredited according to Regulation EC no 765/2008. The CAB is competent to carry out conformity assessments of Qualified Trust Service Providers and its services.

8.3. Assessor's relationship to assessed entity

The auditor of the CAB shall be independent from ZealiD and ZealiD assessed systems. The internal auditor shall not audit his/her own areas of responsibility.

8.4. Topics covered by assessment

The conformity assessment covers the conformity of information system, policies and practices, facilities, personnel, and assets with eIDAS regulation, respective legislation and standards.

The CAB audits all parts of the information system used to provide Trust Services. Activities subject to internal auditing are the following:

- Quality of Service
- Security of Service
- Security of operations and procedures;

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

The CAB Protection of the data of Subscribers and security policy, performance of work procedures and contractual obligations, as well as compliance with CPS and service-based Policies and Practice statements.

The CAB and the Internal Auditor also audit these parts of the information system, policies and practices, facilities, personnel, and the assets of sub-contractors that are related to providing ZealiD Trust Services (e.g. including RAs).

8.5. Actions taken as a result of deficiency

Where the CAB identifies deviations or non compliance in the assessment, the Supervisory Body requires ZealiD to remedy these to fulfil requirements within a time limit set by the Supervisory Body.

ZealiD makes efforts to stay compliant and fulfil all requirements of the deficiency on time. ZealiD management is responsible to implement a corrective action plan. ZealiD assesses the deviations or non compliance items and prioritizes appropriate actions to be taken. If any deviations relate to the protection of personal data, the Supervisory Body shall inform the data protection authority.

8.6. Communication of results

Certificate(s) for trust service(s) resulting from conformity assessment audits conducted pursuant to the eIDAS regulation, corresponding legislation and standards, are published on ZealiD’s website <https://www.zealid.com/repository>.

ZealiD submits the resulting conformity assessment report to the Supervisory Body within three working days.

9. OTHER BUSINESS AND LEGAL MATTERS

9.1. Fees

9.1.1. Certificate issuance or renewal fees

Subscriber is not required to pay fees for Certificate Issuance.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

9.1.2. Certificate access fees

Subscriber is not required to pay fees for Certificate access.

9.1.3. Revocation or status information access fees

Neither Subscribers nor Relying Parties are required to pay fees for accessing revocation or status information.

9.1.4. Fees for other services

Relying parties pay fees according to Master Service Agreements and Service specification signed with ZealiD.

9.1.5. Refund policy

ZealiD handles refund requests from Relying Parties on a case-by-case basis.

9.2. Financial responsibility

9.2.1. Insurance coverage

ZealiD has professional services insurances required by law and published on www.ZealiD.com/repository.

9.2.2. Other assets

No stipulation.

9.2.3. Insurance or warranty coverage for end-entities

See clause 9.2.1. above

9.3. Confidentiality of business information

9.3.1. Scope of confidential information

Subscriber has the right to access all personal data held by ZealiD. Any other information known to the Subscriber or Relying party whilst using the services, and that is not intended for publication, is confidential.

9.3.2. Information not within the scope of confidential information

Any information not listed as confidential or intended for internal use is public information. ZealiD reserves the right to publish non-personalised statistical data about its services.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

9.3.3. Responsibility to protect confidential information
ZealiD safeguards confidential information and information intended for internal use from illicit access and use by third parties.

9.4. Privacy of personal information

9.4.1. Privacy plan
ZealiD strives to minimize the risks for the individual when processing personal data. ZealiD strictly adheres to the principles and regulations required by GDPR. ZealiD services are designed with privacy in mind.

9.4.2. Personal Data Processed
The scope of Personal Data processed by ZealiD is listed under TRA-PS found under www.ZealiD.com/repository or by other RA practice statements.

9.4.3. Information not deemed private
No stipulation.

9.4.4. Responsibility to protect personal data
ZealiD ensures protection of personal information by implementing security controls as described in chapter 5 of this CPS.

9.4.5. Notice and consent to use personal data
ZealiD Subscriber terms & conditions describe under which the subscriber grants ZealiD his/her notice and consent to use his/her personal data.

9.4.6. Disclosure pursuant to judicial or administrative process
Where ZealiD is required by law, court of law or law enforcement requests to disclose personal data ZealiD will comply.

9.4.7. Other information disclosure circumstances

9.5. Intellectual property rights

ZealiD is the exclusive holder of all intellectual property rights to this CPS.

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

9.6. Representations and warranties

9.6.1. CA representations and warranties

ZealiD is a TSP participant in a mutual contract between TSP, Subscribers and Relying Parties. This CPS shall form the basis of such contract.

ZealiD shall:

- provide its services consistent with the requirements and the procedures defined in this CPS and according to the policies under which this CPS is created.
- Be responsible for the effective compliance with the procedures set forth in this CPS
- Provide the service in compliance eIDAS regulation and related legal acts and standards
- Provide publicly published repositories with high electronic availability of all practice statements mentioned in this CPS.
- Honour its part in Subscriber terms and conditions and secure Subscriber availability and access to the services set out in this CPS
- Protect the integrity and confidentiality of personal data and information acquired as part of service provisioning and not subject to publication
- Maintain the integrity of Trust Service Access to Relying parties (e.g. Tokens) and offer effective services to check the validity of certificates
- Inform the Common Criteria Assessment body and National Supervisory Body of any changes to a public key used for the provision Trust Services
- Within 24 hours after having become aware of it, notify the Supervisory Body of any breach of security or loss of integrity that has a significant impact on the Trust Service provided
- Within 72 hours after initial discovery, notify the Swedish Data Protection Authority (Datainspektionen) of any personal data breach
- Where the breach of security or loss of integrity or personal data breach is likely to adversely affect a natural or legal person to

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

whom the Trusted Service has been provided, notify the natural or legal person of the breach without undue delay;

- Preserve all the documentation, records and logs related to Trust Services according to the clauses 5.4 and 5.5;
- Ensure a conformity assessment with a CAB on a recurring basis according to requirements.
- Present the conclusions of the CAB to the Supervisory Body to ensure continual status of Trust Services in the Trusted List;
- Have the financial stability and resources required to operate in conformity with this CPS;
- Publish the terms of the compulsory insurance policy and the conclusion of CAB in the ZealiD online repository
- Secure that ZealiD employees do not have criminal records of intentional crime

ZealiD further warrants that it has documented contracts and contracts with its subcontracting and outsourcing partners.

ZealiD has defined in these contracts liabilities and ensured that partners are bound to implement any requirements and controls required by ZealiD.

ZealiD works with its best to guarantee that all potential service users, especially people with disabilities, can access the services provided by ZealiD on an equal basis. ZealiD accepts that its services imply at least some sort of qualitative capabilities and legal capacity, but nonetheless truly aspires to provide trust services and related technical solutions in a nondiscriminating way.

9.6.2. RA representations and warranties

Where the ZealiD TRA Service is acting RA, TRA Service specifically shall:

- Perform its services according to the TRA-PS,
- Meet the level of assurance equivalent to physical presence in remote identification as set forth in German national state-of-the-art legislation conformant to eIDAS

In addition ZealiD TRA Service and any other participating RAs shall:

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- Provide its services consistent with the requirements and the procedures defined in the contract between ZealiD and RA, in this CPS and all other service-based Policies and Practice statements;
- Meet the level of assurance equivalent to physical presence in remote identification as set forth in any EU state national state-of-the-art legislation conformant to eIDAS
- Provide necessary training for its employees;
- Upon any known security or integrity breach notify ZealiD of any that has an impact on the Trust Service provided or on the personal data maintained therein.
- Enforce policies for background checks to prevent employees convicted of intentional crimes having Trusted Roles.

9.6.3. Subscriber representations and warranties

The Subscriber shall:

- Use all trust services in his/her name with correct and complete information in the application for the services.
- Where data submitted has changed, notify any and all corrections and amendments to the data in accordance terms & conditions and this CPS
- Note that intentionally presented false, incorrect or incomplete information will lead to denial of application and may lead to a police report
- be solely responsible for the maintenance of his/her private key and Trust Service Tokens.

The Subscriber shall use his/her private key and Trust Service Tokens in accordance with this CPS and service terms and conditions.

9.6.4. Relying party representations and warranties

A Relying Party shall:

- Review and observe the documentation, risks and liabilities related to the acceptance of Trust Service Tokens. The risks and

Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

liabilities have been set out in this CPS, and in the service terms and conditions.

- Review and observe all necessary means and methods of integration and data communication as set forth under developer.ZealiD.com
- Verify the validity of Trust Service Tokens on the basis of validation services offered by ZealiD using the prescribed methods of data communication with and appropriate cryptographic information.

9.6.5. Representations and warranties of other participants

No stipulation.

9.7. Disclaimers of warranties

ZealiD:

- is liable for the delivery of all its obligations specified in clause 9.6.1 to the extent prescribed by Swedish law
- maintains adequate insurance coverage and contracts covering ZealiD Trust Services and providing liability compensation

ZealiD is not liable for:

- Non performance according to this CPS by Force Majeure
- That Subscriber private keys are kept secret or for any abuse of certificates
- Any errors in checking Trust Service Tokens on the part of Relying parties
- Any non-performance where this is due mistakes made by the Supervisory Body, the Data Protection Supervisory Authority or any other public authority or Trusted List,

9.8. Limitations of liability

The limits of liability claims arising from this CPS are established in the insurance policy and can be found at <https://www.zealid.com/repository>

9.9. Indemnities

Indemnities between the Subscriber and ZealiD are regulated in service based Terms and Conditions ZealiD QeID.

9.10. Term and termination

9.10.1. Term
No stipulation.

9.10.2. Termination
This CPS remains in force until a new version is announced and published or when it is terminated due to Trust Service or ZealiD's termination. In the event of ZealiD's or the Trust Service termination, ZealiD is obliged to ensure the protection of personal and confidential information.

9.10.3. Effect of termination and survival
ZealiD communicates the status of this CPS's on its public repository.

The communication specifies which provisions survive termination. In case of such termination, and to meet its obligations, ZealiD archives and logs personal and confidential information, as well as the public information present on the repository.

Subscriber contracts are in effect until the certificate is revoked or expired, even if this CPS terminates. Termination of this CPS cannot be done before termination actions described in clause 5.8 of this CPS.

9.11. Individual notices and communications with participants

ZealiD uses its website www.zealid.com for all notifications and communications to subscribers and relying parties. In addition, smartphone applications (ZealiD app or app SDK) may be used for notifications and communications.

9.12. Amendments

9.12.1. Procedure for amendment
See 1.5.4 of this CPS.

9.12.2. Notification mechanism and period
See 2.2.1 of this CPS.

9.12.3. Circumstances under which OID must be changed
No stipulation.

9.13. Dispute resolution provisions

All disputes between the parties will be settled by negotiations. If parties fail to reach an amicable contract, the dispute will be resolved in the District Court of Stockholm, Sweden.

The Subscriber or other party can submit their claim or complaint on the following email: legal@zealid.com

9.14. Governing law

This CPS is governed by the jurisdiction of the European Union and Sweden.

9.15. Compliance with applicable law

ZealiD ensures compliance with the legal requirements to meet all applicable statutory requirements for protecting records from loss, destruction and falsification, and the requirements of the following:

- eIDAS - Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC
- Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) effective from 2018-05-25
- ETSI EN 319 401 Electronic Signatures and Infrastructures (ESI); General Policy

Requirements for Trust Service Providers

- ETSI EN 319 411-1 Electronic Signatures and Infrastructures (ESI); Policy and Security requirements for Trust Service Providers issuing certificates; Part 1: General requirements
- ETSI EN 319 411-2 Electronic Signatures and Infrastructures (ESI); Policy and security requirements for Trust Service Providers issuing certificates Part 2: Policy requirements for certification authorities issuing qualified certificates
- Requirements for Trust Service Providers issuing Time-Stamps

9.16. Miscellaneous provisions

9.16.1. Entire contract

ZealiD mandates each RA by way of contractual obligation to comply with this ZealiD QeID CPS. ZealiD also requires each party using its services to sign a contract that outline all terms of the service. If an contract has provisions that differ from this CPS, then the contract with that party prevails, if precedence to this CPS is explicitly defined in the contract.

9.16.2. Assignment

Any entities operating under this CPS may not assign their rights or obligations without the prior written consent of ZealiD. Unless specified otherwise in a contract with a party, ZealiD does not provide notice of assignment.

9.16.3. Severability

ZealiD may claim indemnification and legal fees from a party for damages, losses, and expenses related to that party's conduct. ZealiD's failure to enforce a provision of this CPS does not waive ZealiD's right to enforce the same provision later or right to enforce any other provision of this CPS. To be effective, waivers must be in writing and signed by ZealiD.

9.16.4. Enforcement

ZealiD may claim indemnification and legal fees from a party for damages, losses, and expenses related to that party's conduct. ZealiD's failure to enforce a provision of this CPS does not waive ZealiD's right to enforce the same provision later or right to enforce any other provision of this CPS. To be effective, waivers must be in writing and signed by ZealiD.

9.16.5. Force Majeure

ZealiD and other parties cannot be held responsible for any consequences caused by circumstances beyond his reasonable control, including but without limitation to

- war,

ZealiD AB		Document name ZealiD QeID Certificate Practice Statement		
Owner CEO	Class P	Category Steering	Date 2019-11-09	Revision 14

- acts of government or the European Union,
- export or import prohibitions,
- breakdown or general unavailability of public telecommunications networks and logistics infrastructure,
- general shortages of energy, fire, explosions, accidents, strikes or other concerted actions of workmen, lockouts, sabotage, civil commotion and riots.

Communication and performance in the case of Force Majeure are regulated between the parties with the contracts.

Non-fulfilment of the obligations arising from CPS and/or relevant service-related Policies and/or Practice Statements is not considered a violation if such non-fulfilment is occasioned by Force Majeure.

None of the parties shall claim damage or any other compensation from the other parties for delays or non-fulfilment of this CPS and/or relevant service-related Policies and/or Practice Statements caused by Force Majeure.
