<b>ZealiD AB</b>		Document name ZealiD Service Specification		
Owner Legal	Class Public	Category Description	Date 2022-02-28	Revision 2

“User”	means a natural person using ZealiD App and engaging with the Customer either directly or via a Partner Platform
“ZealiD”	means ZealiD AB - the Service provider
ZealiD App	A smartphone application based on iOS or Android operating systems available in Google Play or Apple Appstore

## 1. Overview

The ZealiD Service (the “Service”) facilitates remote identification of natural persons (“Applicants”), to which qualified certificates for signing and authentication are issued (“Subscribers”). This facilitates an array of different user journeys for companies (“Customers”). The Service caters to customers of all sizes and industries and global users.

The main components of the Service are

- ZealiD App: an iOS and Android compatible smartphone app available in Google Play and App Store
- ZealiD API: a set of REST APIs that allow the Customer online site(s), together with ZealiD app (or API/SDK and White label derivatives), to facilitate remote registration and authentication of a User as well as electronic signing of documents.
- ZealiD App API/SDK or Whitelabel: derivatives of ZealiD app that allow Customers to integrate ZealiD app type services in their own app or Whitelabel version of ZealiD app.

Owner Legal	Class Public	Category Description	Date 2022-02-28	Revision 2

ZealiD performs the Service as a Qualified Trust Service provider under the EU eIDAS regulation (see ZealiD [Repository](#) “CPS” and “TSPS” practice statements).

## 2. Relationship to other documents

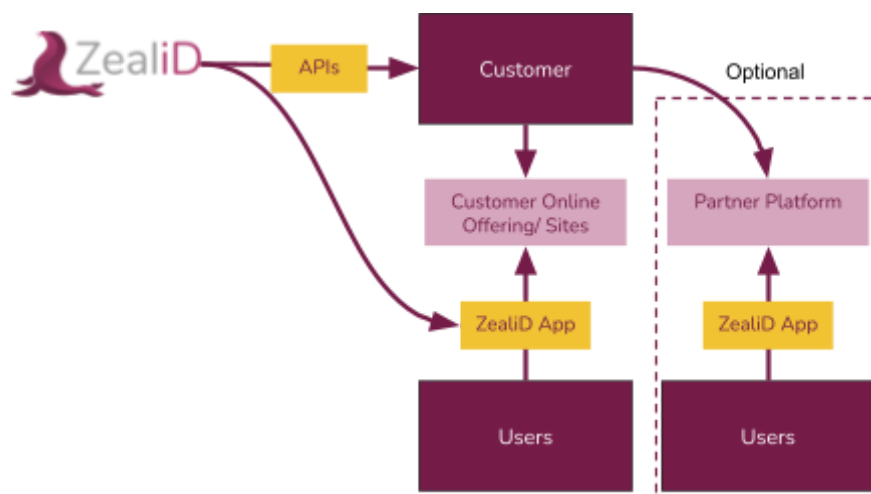

This Service Specification follows from

- a) the Purchase Order and
- b) the ZealiD Service Agreements between Customers and ZealiD.

Service Agreements are published on ZealiD [Repository](#).

## 3. Participants

Note below participants overview. ZealiD app can also be app API/SDK or White label type connections.

## 4. ZealiD Service Deliverables

ZealiD shall:

1. Adhere to its published practice statements “CPS” and “TSPS” published on ZealiD [repository](#) including fulfillment of all necessary legal requirements to deliver the Service.
2. Provide technical documentation in the developer [portal](#) and FAQs to support the integration of APIs to Customer or to a Customer Partner Platform
3. Provide a test environment for Customer
4. Provide technical support according to the Purchase Order for Customer developers to execute an effective integration and assist the Customer in creating and configuring a Customer profile on the Service.
5. Ensure that the customer has a fully functioning Service following the integration acceptance testing (or alternatively acceptance via partner).
6. Deliver to the customer the Service according to the Purchase Order as a minimum:
  - a. Remote registration in ZealiD app (or derivatives such as API/SDK or White label app)
  - b. Authentication of the end user via ZealiD app (or derivatives such as API/SDK or White label app) and necessary Customer or Partner side software as set forth in the developer portal
  - c. Reception of Customer transmitted supported file type documents (see developer portal) for execution of electronic signing
  - d. Transmitting of signed documents according to developer portal
  - e. Transmitting to the Customer all supported data related to the purchased Service as set forth in the developer portal and agreed to in the Purchase Order
  - f. if Purchase Order includes Extended data - access to the data that follows from Chapter 5 below.
7. Manage the collection of User consent in registration and for all registrations, authentications and electronic signatures
8. Manage billing of Customer partner fees in a timely manner
9. Provide support according to the Purchase order, but as a minimum 1st and 2nd Line Customer Support for the Service during office opening hours CET 0900-1800 weekdays
10. Provide End User Support according to Purchase order, but as a minimum the published Support opening hours (minimum CET 0900-1800 during business days).
