### 3 The Service

1. The Service performs identification of natural persons remotely using a machine assisted manual process. All identification steps require your active participation and consent.
2. The Service provides the registration functionality for eIDAS Qualified Trust Service Providers ("QTSP") that act as Certificate Authorities ("CAs"). CAs use the Service to perform eIDAS compliant registration authority services for qualified certificates and signatures.
3. The certificates and signatures issued by the CAs are used to assist online service providers seeking to identify you and enter into contractual relationships with you. These service providers (e.g. banks) need to comply with anti-money laundering, anti-terrorism, identification, age verification, youth media and esignature legislation and regulation.
4. The Service is provided via a smartphone app on iOS and Android platforms to you.

#### SELF SERVICE REGISTRATION

In addition to providing your email and mobile phone number, the Service will require you to go through a self-service registration process with the following steps:

- a. Select country and your bank (or similar) from a country list in the Service interface. Access (sign-in and authenticate) your personal online bank account

<b>ZealiD AB</b>		Document name Terms & Conditions Subscribers ZealiD TRA Service

via the Service interface. This may be an additional interface between you and the interface of your third party online account service, designed specifically for the purposes of simplifying the process of verifying your identity. Please note, that this service may be provided by a subcontracting licensed financial service provider acting as a personal data controller with its own terms & conditions for personal data processing.

- b. By establishing the access in item a. above, share the personal and other data on your account with ZealiD such that the Service can capture any and all data on the third party account necessary for your identification.
- c. Demonstrate that you are physically present in front of your smartphone using a smartphone video selfie service (so called *Zoom Liveness* check). The Service will establish that you are physically present and capture high resolution photos and/or videos of your face used to verify your identity together with your ID Document photo (see step d below).
- d. Take pictures with your smartphone camera of a valid Government issued Identity document (e.g. Passport) using the Service. Proceed to do a video capture with a smartphone of the Identity document. The Service may extract, process and verify any and all data on the ID document, including biometric pictures and signatures. The Service may also process any unintentional personal data captured by you in the video stream.

If you select a video identification option at the start of the self service registration or where ZealiD for quality assurance purposes so requires, you will be asked to:

- e. Enter into a live human to human video identification conference provided by ID Now GmbH where you answer questions, demonstrate possession of the ID document and prove your registered address.

## ACTIVE CONSENT

5. You as the User carry out and complete all necessary steps for proceeding with the Service such as authenticating to your online account, taking a picture and videos with a smartphone camera of an Identity document and taking a selfie picture and video using the liveness module. You have full control over all phases of the completion of an identification and can abort at any time. The service is based on your active participation and consent for each step.
6. If the personal identification data that is necessary for identification is available only on a separate account accessible from the first account through embedded functionality

<b>ZealiD AB</b>		Document name Terms & Conditions Subscribers ZealiD TRA Service		
Owner CEO	Class P (public)	Category Steering	Date 2021-04-26	Revision 11

such as links, buttons, iframes etc, you grant us permission to activate the necessary functionality to process all personal data on the second account in order for us to extract and verify your identity data.

#### LOGIN INFORMATION PROVIDED BY THE USER

7. Any identification executed with the use of personalised security credentials (codes/passwords etc.) shall be deemed to be carried out by the authorized owner of the account.
8. Any login information provided by you during the identity verification process will be collected and processed by the Service. ZealiD or its partners will forward the information, through the Service interface, to the corresponding interface of your online bank or other account through a secure connection. All communications made by you when using the Service are encrypted and the confidential login information of the User is forwarded to the corresponding input-field of the selected bank but is never stored. ZealiD may, however, store and process any and all information provided by you in connection with using the Service.

#### PERSONAL DATA PROCESSING

9. By using the Service, you agree that information about you available in various parts of a third party account interface, or otherwise submitted by you, including but not limited to name, address, telephone number, email address, bank account number, personal identity number and passport number/identity card number is used by the Service for the purpose of verifying your identity.
10. You specifically consent to ZealiD processing and storing personal data that allow us to uniquely identify you as a natural person. Such personal data includes unique identifiers such as personal code, citizen service number, social security number, etc.. For example, Dutch BSN (“burgerservicenummer”), Swedish personal number (“personnummer”) and Lithuanian personal code (“asmens kodas”).

#### MICRO PAYMENT OPTION

11. To demonstrate that you are in control of your account, we may also ask you to do a micro payment to our account, a so called “10 cent transfer”. The purpose of the transfer is to comply with specific identification requirements found in many anti-money laundering regulations. This part of our service is provided by our licensed finance partners and the service is subject to their terms and conditions. You understand that by

authorizing the transfer you will pay a micro payment from your account to us that will not be reimbursed. The amount will be transferred upon choice of account and accepting the transfer in the service.

#### SMARTPHONE PHOTO AND SELFIE VIDEO

12. We use automated software combined with manual vetting to process and read characters and words present on the photo of the Identity document, and/or process a selfie video and compare it with an ID document photo. Our Service uses artificial intelligence to assess the authenticity of the named identity documents.

#### ELECTRONIC SIGNATURE ISSUED BY CERTIFICATE AUTHORITY

13. As part of the Service you are asked to accept an authentication method (e.g. FaceID). This will be set up using your email and mobile phone for transmission of one time passwords. This is to prepare the CAs process of issuing certificates to you tied to your smartphone with a Private Key under your secure control. At the end of the registration process you can submit a Certificate application to the CA by signing a Subscriber Agreement including Terms and Conditions, and by accepting the Certificate.

#### AUTHORIZATION/PERMISSION TO FORWARD INFORMATION ABOUT THE USER

14. The identity data specified in the ZealiD TSPS is processed and verified during the registration process and forwarded by the Service to the CA for the purpose of registration authority duties where the CA issues a certificate and electronic signatures to you.
15. Your permission to forward data includes personal data processed by our trusted sub-contractors and delivered to us as part of your registration process.

#### STORAGE OF PERSONAL DATA CAPTURED

16. The Service does not store your data after successful registration. The Service forwards the data to the CA.
