

Are you an expert in network administration, including firewalls, routing, and container environments?

THE COMPANY

ZealiD is at the forefront of digital identities and electronic signatures. ZealiD is designed to connect citizens with their first and only electronic identity and signature. We are innovating the current systems with new, bold methods. ZealiD is the future of digitalization, and we want you to be a part of our story.

THE PEOPLE

We are hikers, paddle players, runners, gamers, movie buffs, parents, partners, coffee enthusiasts. Your future colleagues represent over ten different countries and together speak over 15 languages. We work, communicate and learn together but also laugh, trade cute pet pics, and share the occasional baked goods. We are a team.

YOUR ROLE AT ZEALID

As a Network and Security Administrator you will be part of our infrastructure team.

Your new role will include:

Design, manage and scale our network infrastructure

Manage our firewalls and network defenses

Support our CI/CD team through expert knowledge on container networks

Perform active and passive automated monitoring of our networks for security issues

Perform hands-on administration of our hardware in Stockholm datacentres

But also bring new ideas and suggestions to the table, be ready and willing to contribute. Learn and engage with the knowledge and expertise we want to share with you along the way.

WHAT ZEALID CAN OFFER YOU:

The opportunity to have your ideas listened to and be part of something significant

Work on exciting and challenging problems

Flexible working hours with a generous work from home policy

We are located in three countries: Sweden, Lithuania and Germany

Competitive salary

WHAT YOU CAN OFFER ZEALID:

5-10 years of experience in DevOps system administration, with focus on Linux networking and firewalls

Experience with virtualized networking, ideally Kubernetes

Experience with VPNs, TLS, and certificate management

Experience with network security monitoring

Scripting experience with Python and command line tools

Good English skills (at least B2) to communicate with your colleagues

THE PROCESS

1. Now you are intrigued with this job ad and what to find out more
2. You email your CV over to jobs@zealid.com and reference which role you are applying for
3. Our wonderful HR team will get back to you, and if we think it's a match, an introductory interview will be scheduled
4. You will meet with senior staff to get a better feel for the company and the role
5. If both parties are happy, we will progress to a skills check with the CTO
6. We will be charming, and you will laugh at our bad jokes
7. At this point, we are hopefully welcoming you to the team and talking about signing contracts - electronically, of course!

PARTING THOUGHTS...

When was the last time you wanted to identify yourself to a company or sign a contract, but had to visit in person?

Are you also surprised when someone asks you to print out and sign documents with a pen?

Have you ever lived or worked in a different country and not been able to verify yourself with a foreign ID?

Then join us and be part of the solution!
