ZealiD AB		Document name ZealiD Service Specification		
Owner Legal	Class Public	Category Description	Date 2021-01-11	Revision 1

“User”	means a natural person using ZealiD App and engaging with the Customer either directly or via a Partner Platform
“ZealiD”	means ZealiD AB - the Service provider
ZealiD App	A smartphone application based on iOS or Android operating systems available in Google Play or Apple Appstore

1. Overview

The ZealiD Service (the “Service”) facilitates remote identification of natural persons (“Users”), qualified signing and authentication for companies (“Customers”). The Service caters to customers of all sizes and industries and global users.

The main components of the Service are

- ZealiD App: an iOS and Android compatible smartphone app available in Google Play and App Store
- ZealiD API: a set of REST APIs that allow the Customer online site(s), together with ZealiD app, to facilitate remote registration and authentication of a User as well as electronic signing of documents.

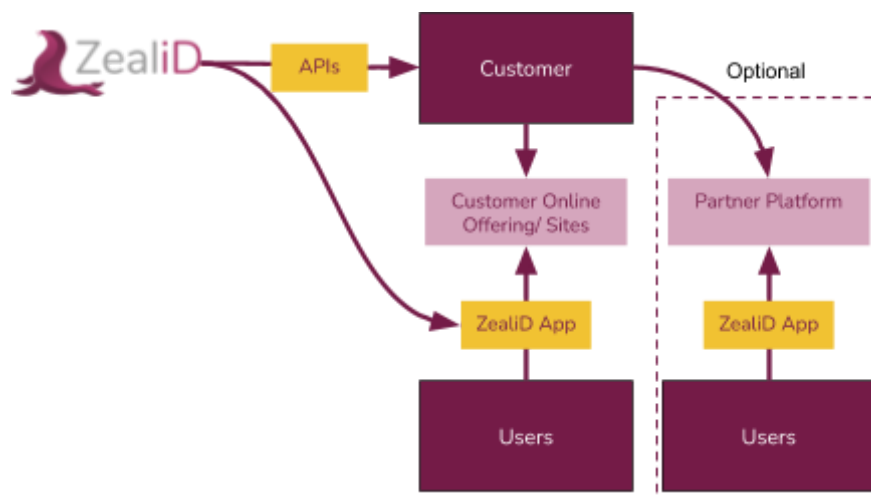

ZealiD performs the Service as a Qualified Trust Service provider under the EU eIDAS regulation and holds an authorization from the Swedish Financial Supervisory Authority to provide account information services (see ZealiD [Repository](#) “CPS” and “TSPS” practice statements).

integration and assist the Customer in creating and configuring a Customer profile on the Service

5. Ensure that the customer has a fully functioning Service following the integration acceptance testing (or alternatively acceptance via partner).
6. Deliver to the customer a Service with the following key features:
 - a. Remote registration in ZealiD app according to the [coverage map](#) to provide a qualified certificate to the user
 - b. Authentication of the end user via ZealiD app and necessary Customer or Partner side software as set forth in the developer portal
 - c. Reception of Customer transmitted supported file type documents (see developer portal) for execution of electronic signing
 - d. Transmitting of signed documents
 - e. Transmitting to the Customer all supported data related to the purchased Service as set forth in the developer portal and agreed to in the Order Form
 - f. If not otherwise agreed in Order Form the data is included as follows from Chapter 5 below.
7. Manage the collection of User consent in registration and for all registrations, authentications and electronic signatures
8. Manage billing of Customer partner Fees in a timely manner
9. Provide 1st and 2nd Line Customer Support for the Service during office opening hours CET 0900-1800 weekdays
10. Provide Customer User Support according to the published Support opening hours (minimum CET 0900-1800).
11. Provide full reporting on transactions performed per Customer partner.
12. Provide full incident and complaint filing and management services.
13. Meet the requirements on service levels set forth in Service Level Agreement.
